

CMOS	51st Annual Congress, June 4-8	Hilton Downtown Toronto	
POSTERS, Weds + Thurs : 1708011			
Abstract Title	Presenter	Poster Number	Poster board
An investigation into Kamloops flash flooding events	Rodger Wu	1702010P01	1 a
Synoptic Forcing on Mesoscale Circulations During Heat Waves at Vancouver, British Columbia.	Daniel Betancourt	1702010P02	1 b
Ensemble-Based Forecast Verification of Typhoon Haikui (2012)	Feng Zhiming	1702010P03	2 a
December 23rd 2014 and January 4th 2015 Freezing Rain Events in Montreal or Aiming at better assessing the duration of a freezing rain event in Montreal	Raphaël Brochu	1702010P05	2 b
Forecasting flood-producing water levels in the Ottawa River and Lake Ontario: May, 2017	Dorothy Durnford	1702020P01	3 a
CONCEPTS Coupled Environmental Prediction Systems	C. Harold Ritchie	1702020P05	3 b
Surface Seiching in Quesnel Lake, BC	Samuel Brenner	1702030P04	4 a
The study of the microphysical and dynamical processes of in-flight icing environments and icing intensity forecast at Cold Lake Alberta, Canada	Di Wu	1702040P01	4 b
Predicting Heavy Snowfall Along the Eastern Rocky Mountains: An Examination Into Hydrometeor Drift	Heather Pimiskern	1702040P02	5 a
Wind Rose Renewal Project	Lindsay Sutton	1702060P01	5 b
Impact of augmenting the quantity of assimilated surface observations in a regional forecast system	Mateusz Reszka	1702060P02	6 a
Synoptic-scale zonal available potential energy increases in the Northern Hemisphere	Kevin Bowley	1702060P03	6 b
CTD dynamic corrections for an unpumped inductive conductivity cell on autonomous platforms	Clark Richards	1703010P01	7 a
Observations of the transport of organic material from the shelf to the abyssal sea off the west coast of Vancouver Island.	Fabio De Leo Carbera	1703010P02	7 b
Characterization of the Flow Dynamics in a Wide, Arctic Canyon	Idalia Machuca	1703010P03	8 a
Frequency analysis of wind forcing over ocean gyres	Yanxu Chen	1703010P05	8 b
Moored observation of abyssal flow and temperature near a hydrothermal vent on the Southwest Indian Ridge	BeiFeng Zhou	1703010P06	9 a
The role of Antarctic sea ice on the meridional overturning circulation.	Matthieu Gavelle	1703010P07	9 b
Long-term performance of the RBR conductivity sensor: Evaluation from an autonomous float	Mark Halverson	1703010P08	10 a
Conversion of Pressure to Depth for Moored Instruments Using a Reference Bottom Mounted Pressure Sensor	Tao Ding	1703010P09	10 b
Decadal simulations of sea surface salinity in the Arctic Ocean	Zhenxia Long	1703010P10	11 a
When will we reach 1.5 of global warming?	Damon Matthews	1704030P01	11 b

Understanding ocean temperature and salinity variability in the Coast of Bays Region, NL	Andry Ratsimandresy	1703020P03	12 a
Internal Solitary Wave Reflection near Dongsha Atoll, the South China Sea	Xiaolin Bai	1703020P05	12 b
Use of Dorado as a Platform for the Validation of High Resolution Ocean Circulation Models	Chris L'Esperance	1703020P06	13 a
Sea state indices for a coastal strait	Richard Dewey	1703020P08	13 b
Investigating the Sensitivity of the Drag Coefficient under Hurricane Conditions in Spectral Wave Models	Shangfei Lin	1703020P09	14 a
Effect of asymmetries in ripple shape and currents on two-dimensional oscillatory flow over ripples.	Subasha Wickramarachchi	1703020P10	14 b
High frequency observations of temperature and oxygen in a large Canadian lake over two winters reveal the role of solar radiation and ice cover in the development of the mixed layer	Bernard Yang	1703020P11	15 a
Simulation of Interannual Circulation Variability in Placentia Bay	Ying Xie	1703020P12	15 b
Heat transport from northern rivers to Canadian Arctic coasts	Daqing Yang	1703020P13	16 a
Algal bloom transport in the Great Lakes using remote sensing and hydrodynamic modelling	Nancy Soontiens	1703030P01	16 b
Characterizing fronts in a whale habitat	Tara Howatt	1703030P02	17 a
Model simulated variations of the California Undercurrent off the Vancouver Island during 2013-2015	Chengyi Yuan	1703030P02	17 b
Origin of seasonal variation of salinity in Bering Strait	Xiaofan Luo	1703030P03	18 a
Evaluation of ocean variability simulated by the high-resolution CONCEPTS regional model of the Arctic and North Atlantic oceans	Simon Higginson	1703030P04	18 b
The setup and testing of a new model of a southern channel in the Arctic Archipelago	David Greenberg	1703030P05	19 a
Predictability of inter-annual variations of bottom temperature and salinity on the Scotian Shelf	Shiliang Shan	1703030P06	19 b
Variability and Wind Forcing of Ocean Temperature and Thermal Fronts in the Slope Water Region of the Northwest Atlantic	Ingrid Peterson	1703060P01	20 a
GOES-R Data Access for Canada	Wayne MacKenzie	1705010P01	20 b
GOES-R Data Requirements in the Area of Weather Forecast and Science Applications	Hong Lin	1705010P02	21 a
Low and High Level Cloud Fraction Feedback over Tropical Oceans	Toni Mitovski	1705020P01	21 b
Evaluating the radiative effects of fog and cloud properties in the Arctic	Joelle Dionne	1705020P02	22 a
Oxidative processing studies on biological ice nucleating particles	Ellen Gute	1705020P03	22 b
Terrestrial Cloud Microstructure Analysis Utilizing the DSCOVR-EPIC Spacecraft	Rachel Modestino	1705020P04	23 a
The statistical characteristics on impacts of aerosol and cloud distributions between two Eastern China regions based on CloudSat/CALIPSO data	Yujun Qiu	1705020P05	23 b
Incorporation of a Four-Stream Solar Radiative Transfer Model into CanAM4.2	Jason Cole	1705020P06	24 a
Estimate and Analysis of Planetary Boundary Layer Height (PBLH) using a Mobile Lidar Vehicle system.	Hyounggu Nam	1705030P01	24 b
The Re-analysis of a Historical Atmospheric High Resolution Infrared Spectral Data-set Recorded at 80N	Pierre Fogal	1705030P02	25 a

Impact assessment of assimilating satellite-derived land surface skin temperature observations in the Canadian Land Data Assimilation System (CALDAS)	Louis Garand	1705030P03	25 b
Polarimetric Retrievals of Cloud Droplet Number Concentrations: Evaluation of Measurements and Correlations with Aerosol Properties	Kenneth Sinclair	1705030P04	26 a
First retrievals of methane isotopologues from FTIR ground-based observations in the High Arctic	Whitney Bader	1705040P01	26 b
Long-term monitoring of the Arctic atmosphere using UV-visible spectrometers at Eureka, Nunavut	Kristof Bognar	1705040P02	27 a
Parallel warming-induced photosynthesis and respiration increases make the CO ₂ and 13C/12C seasonality stable under changing climate and vegetation activity	Alemu Gonsamo	1705040P03	27 b
Diagnostic of Arctic atmosphere energy budget during the polar night	Housseyni Sankare	1705040P04	28 a
High Arctic atmospheric water vapour measurements at PEARL	Dan Weaver	1705040P06	28 b
A Compact Cavity Ring-Down Spectroscopy Analyzer for in Situ measurements of Carbon Dioxide, Methane, and Water Vapor	Milos Markovic	1705050P01	29 a
Remote Sensing of Greenhouse Gases at East Trout Lake	Joseph Mendonca	1705050P03	29 b
Orientation and Spacing of Small-scale Surface Features in Mars' North Polar Cap: Preliminary Results	T. Giang Nguyen	1707050P01	30 a
Using a Laser and Camera to Determine the Depth and Turbidity of Water	Elisabeth Smith	1707050P02	30 b
