Revisiting Tropical Storm Lidia: A Vacation Turned Nightmare

By: Daniel Liota

Meteorologist for the Ontario Ministry of Natural Resources

Many incredible photos and videos have come out of last year's active storm season in the tropics. For many Canadians the impacts and devastation from these hurricanes and tropical storms can be unfathomable. At the same time, it is these forces of nature which have inspired and captivated so many in the scientific community. Severe storms of all kinds were the spark to Daniel Liota's fascination with the weather that started at a very young age.

Daniel Liota takes us on a journey as he recounts his direct encounter with Tropical Storm Lidia while vacationing in Cabo San Lucas, Mexico last summer. After being stranded at a popular destination resort for days, he recalls the importance of always being prepared and having an emergency plan in place for when potentially life-threatening weather strikes.

Date/Time: 6:00 pm on May 15, 2018

Location: Petrie Science Building, Room 422, York University
4700 Keele St, Toronto, ON M3J 1P3

Note: Dinner will be provided free of charge to CMOS members. Please confirm your attendance by May 13 by sending an email to Zheng Qi via zhengqi_w@hotmail.com
